

INDUSTRIAL PRODUCTS

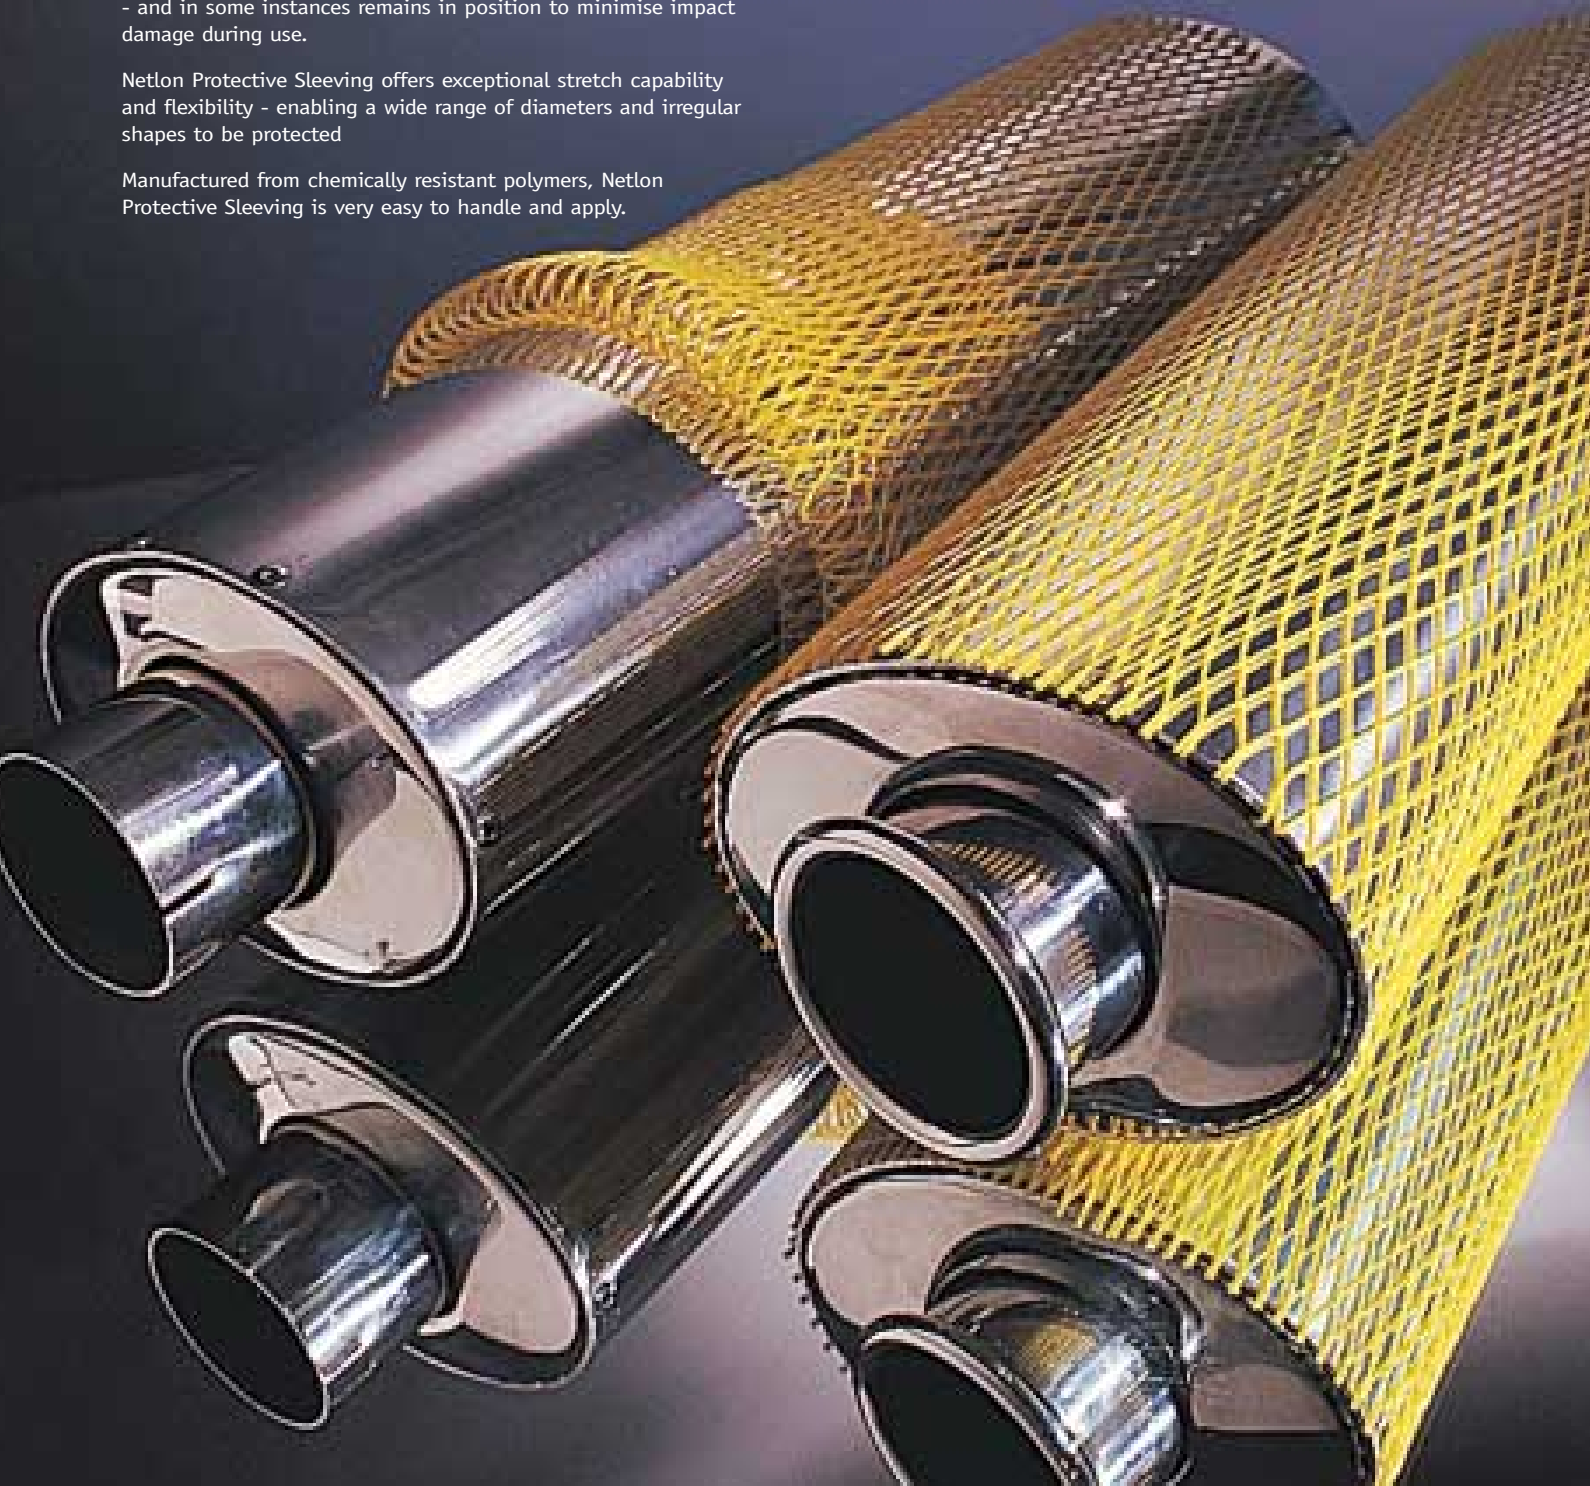

Protective sleeving

Netlon Protective Sleeving provides effective and economical protection for a wide range of products during manufacture, storage and distribution.

It is widely used in engineering to protect machined components during the manufacturing process and on through delivery to the end user. It is also used to provide protection for ceramics, glass and other fragile components during manufacture and transport - and in some instances remains in position to minimise impact damage during use.

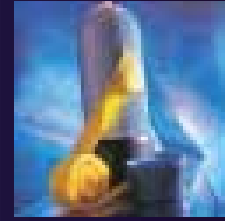

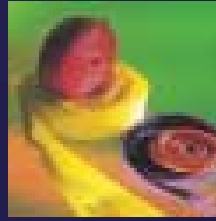

Netlon Protective Sleeving offers exceptional stretch capability and flexibility - enabling a wide range of diameters and irregular shapes to be protected

Manufactured from chemically resistant polymers, Netlon Protective Sleeving is very easy to handle and apply.

INDUSTRIAL PRODUCTS

Protective sleeving

Two ranges of protective sleeving are available. The Premier Range, in a heavier gauge mesh, is supplied in 11 colour coded sizes with the capability of handling diameters from 6mm up to 225mm. The lighter weight Universal sleeving is supplied in 6 colour coded sizes and can handle diameters from 6mm to 400mm.

THE PREMIER RANGE

- Heavy gauge/weight
- Offers the highest level of protection
- Small aperture
- 11 sizes

Colour Code	Diameters	Unit of Supply
Red	6mm - 13mm	50m hank
Black	13mm - 26mm	50m hank
Orange	26mm - 40mm	25m reel
Brown	40mm - 50mm	25m reel
White	50mm - 65mm	25m reel
Grey	65mm - 80mm	25m reel
Yellow	80mm - 100mm	25m reel
Blue	100mm - 125mm	25m reel
Green	125mm - 160mm	25m reel
Straw	160mm - 190mm	25m reel
Royal Blue	190mm - 225mm	25m reel

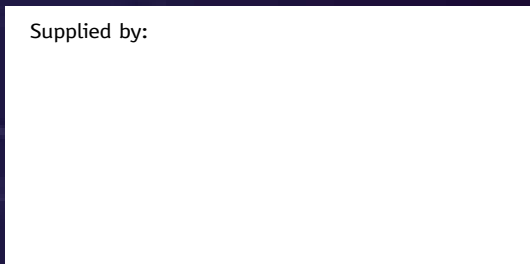

THE UNIVERSAL RANGE

- High stretch capability
- Forms itself round irregular shaped objects
- Supplied in dispenser cartons for ease of use
- 6 sizes capable of handling diameters up to 400mm

Colour Code	Diameters	Unit of Supply
Orange	6mm - 17mm	250m reel
Black	10mm - 25mm	250m reel
Violet	25mm - 60mm	50m reel
Red	50mm - 100mm	50m reel
Yellow	100mm - 200mm	50m reel
Royal Blue	200mm - 400mm	50m reel

In addition Netlon supplies a Black polyethylene Stillage Separator to provide protection for components stored or shipped in stillages. Unlike cardboard, Netlon Stillage Separators are oil and chemical resistant. The open mesh allows oil and swarf to drain through, resulting in cleaner components.
