

TILTWATCH PLUS

A Precise Tilt Monitoring Solution for Sensitive Shipments That Must Remain Upright

Just-in-time delivery with zero defects is a reality with the Tiltwatch Plus attitude indicator. Tiltwatch Plus gives you the shipping control beyond a passive printed warning. Simply peel the label and place it on your containers to ensure upright delivery of your products. Tiltwatch is user friendly and accurate.

Use the Tiltwatch Plus to:

- Substantiate damage claims
- Decrease product damage
- Train carriers and employees of best practice handling techniques
- Evaluate carriers

It's a reliable and affordable solution to monitoring and controlling the shipping attitude of orientation sensitive shipments such as:

- ✓ Telecommunications Equipment
- ✓ Heavy Machinery
- ✓ Large Computer Systems
- ✓ Copiers, Printers And Scanners
- ✓ Industrial Batteries
- ✓ Hazmat Containers
- ✓ Medical Equipment

Twenty years of exposure through the transportation corridors of the world guarantees instant recognition. A precision manufacturing process assures consistent quality and performance.

SIMPLE AND FOOLPROOF

The Tiltwatch Plus features a simple one step application. Removing the adhesive backing automatically arms the device. Because the arming mechanism is removed and discarded during installation, the unit cannot be reset once activated, and is impossible to disarm once applied. Other tilt indicators that arm from the front or side are subject to tampering and environmental conditions.

The Tiltwatch Plus incorporates three separate indicators; two that will determine the exact angle of tilt and from what direction the shipment tilted, and one that indicates whether complete overturn has occurred. Together the Tiltwatch Plus indicators provide 360° monitoring.

If the box is tilted, or even completely overturned, the indicator will move from its starting position to a new position within the unit indicating a potentially damaging incident has occurred.

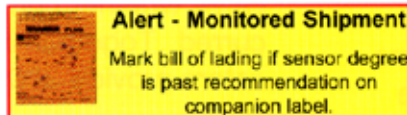

IT'S NOT JUST A PRODUCT IT'S A PROGRAM

A key element to the success of Tiltwatch Plus is its companion tools. Every unit includes not only the Tiltwatch Plus indicator, but also includes:

- A companion label for marking the tilt angle not to be exceeded. It also serves to alert the customer of what to do when shipment is received, and to increase the awareness of the monitor.

- An alert sticker affixed to the bill of lading cautions the carrier and consignee that your shipment is being monitored.

In addition, posters and specially marked alert tape can be purchased separately to increase awareness and train employees on proper handling practices.

SPECIFICATIONS

Activation Angle:	Measures 10° increments from 90° axis
Accuracy:	+/-5%
Monitoring Range:	360° monitoring w/in a single plane
Adhesive:	1 mil high tack acrylic
Humidity Tolerance:	5% to 99% non-condensing
Temp. Tolerances:	-40° F to +140° F
Composition:	Clear P.E.T.E. housing, stainless steel, non-magnetic indicator
Size:	4.63" x 4.63"x.25"
Installation:	Pressure sensitive adhesive exposed when liner and arming pin are peeled
Adhesive Shelf Life:	12 months (before application)

ENHANCE YOUR TILT MONITORING PROGRAM WITH SHOCKWATCH

Media Recovery also develops a complete line of impact indicators used to monitor impact sensitive shipments. Shockwatch, for example, has been used in the transportation industry for over 20 years and continues to be the industry standard for shipment monitoring.

- Reduce damage claims
- Train proper handling techniques to personnel
- Improve quality assurance
- Test packaging effectiveness

Damage claims do not have to be part of running your business. Contact your local distributor, or Media Recovery for more information.

ABOUT MEDIA RECOVERY

Media Recovery develops, manufactures, and markets a broad range of damage prevention and safety products. Media Recovery products, known for high quality, excellent reliability and leading technology, are distributed worldwide by a national sales force and a network of strategic partners and resellers. Founded in 1974, the company is privately owned and is headquartered in Dallas, Texas. More information on the company is available by contacting the company directly or accessing the web page at www.shockwatch.com.
